Snowbunny

Did you see the 3rd page? Were you editing it by chance

Snowbunny

theres nothing there..

tennesa

no.. i noticed that it was all gone, so i added the categories

tennesa

early i tried getting on to it, but it said the page wasnt even created.

*** tennesa left the chat room.

*** tennesa entered the chat room.

tennesa

hello?

Snowbunny

hey

Snowbunny

sorry..

Snowbunny

okay we figured out the page thing...

tennesa

okay what happen

Snowbunny

we had them linked to the wrong page...

tennesa

weird

Snowbunny

So we were just discussing how we think we should do the random selection thing when we hand out

Snowbunny

the random blood type cards...

tennesa

okay.

Snowbunny

then we were thinking we could put traits on the card that would indicate specific blood type traits to help them find out what blood type they are

Snowbunny

you know what I mean? Like so they have a way to use the internet and technology to find out traits of blood types to find their blood type

tennesa

okay that sounds good. so do we know what teh driving question is yet

Snowbunny

I dont think so... got any idea?

Snowbunny

s?

tennesa

so they would look up what type A blood has that AB or O doesnt contain?

Snowbunny

ya... something like that

tennesa

i dunno.. .what about the idea that the kids come up with a way to solve the issue or what ideas they think can help the virus not carry to future B carriers

tennesa

or they might have to make some kind of diagram to dimostrate their understands of the different blood typs.

Snowbunny

ya that's a good idea. We were just saying that that would be a good way to make the end result a technology project...
